SUMMARY

Information Technology professional and Master of Information Technology and Systems candidate at the University of Tasmania, with experience in enterprise application support, business analysis, incident and problem resolution, system testing and process improvement. Experienced with SAP ERP/S/4HANA, SQL, Microsoft SQL Server and web technologies, with strong capabilities in troubleshooting, requirements analysis and stakeholder support. Combines professional enterprise systems experience with current hands-on systems development experience at UTAS.

CORE CAPABILITIES

Systems & Application Support: Enterprise application support; incident and problem management; issue investigation; root-cause analysis; escalation support; user support; troubleshooting

Business & Systems Analysis: Requirements gathering; business process analysis; functional analysis; process improvement; stakeholder engagement; solution validation

Database & Technical: SQL; Microsoft SQL Server; MySQL; SAP ERP/S/4HANA; system integration concepts; reporting; web technologies

Development: JavaScript; React; Node.js/Express; HTML; CSS; REST-based web development; Git/GitHub

Testing & Change: UAT; functional testing; defect identification; system validation; change implementation support; release support; continuous improvement

Documentation & Communication: Requirements documentation; support documentation; technical communication; training materials; user guidance; client communication; multidisciplinary collaboration

Tools: Microsoft SQL Server Management Studio; VS Code; Git/GitHub; Figma; draw.io; Microsoft Office Suite

SELECTED SYSTEMS & TECHNOLOGY PROJECT

Business Analyst / Front-End & Systems Contributor

UTAS Payroll Forecasting Tool – KIT700 ICT Systems Project | 2026

- Work directly with the UTAS client to analyse business and system requirements and translate them into functional features and acceptance criteria.
- Contribute to development of the web application using React, Node.js/Express and Microsoft SQL Server, working across front-end, backend, database and integration components.
- Work with SQL Server data and application logic and support functional testing, validation, defect identification and issue resolution.
- Maintain requirements and supporting project documentation while collaborating through Git/GitHub, client demonstrations and iterative feedback.

AQ1 Systems – Business Process Innovation Project

KIT730 Business Process Innovation | 2026

- Analysed an existing technology-enabled business process through stakeholder engagement, process mapping and structured business analysis.
- Identified process issues, improvement opportunities and technology-enabled solutions using evidence gathered from stakeholder consultation.
- Applied process improvement and analytical techniques to develop practical recommendations focused on efficiency, usability and operational outcomes.

PROFESSIONAL EXPERIENCE

PTE / IELTS Academic Test Invigilator (Casual) – University of Tasmania, Hobart

Feb 2026 – Present

- Deliver computer-based academic assessment sessions in accordance with University, testing, security and operational procedures.
- Provide responsive candidate support and troubleshoot operational and technical issues, escalating matters appropriately where required.
- Prioritise issues in time-sensitive assessment environments while maintaining accuracy, confidentiality and a strong student-focused service experience.
- Work collaboratively with University staff and testing personnel to support reliable delivery of assessment services and resolve operational issues.
- Maintain accurate records and follow established procedures relating to incidents, candidate matters and assessment operations.

Associate Consultant – Rizing Lanka Pvt (formerly attune Consulting)

Apr 2022 – Feb 2025

- Provided application and functional support across complex SAP ERP/S/4HANA environments, investigating incidents, system issues and business-process requirements.
- Performed root-cause analysis and coordinated resolution/escalation with business and technical teams, contributing to an approximately 20% reduction in recurring critical incidents.
- Analysed business requirements and supported enterprise application enhancements and process improvements.
- Supported system changes, testing, UAT and release activities, validating functionality against business requirements.
- Maintained functional documentation and clear stakeholder communication while supporting users, contributing to approximately 95% user satisfaction.

Part-Time Lecturer– American National College (Affiliated with Northwood University)

May 2024 – Feb 2025

- Delivered undergraduate teaching in Enterprise Resource Planning, Management Information Systems and IT Infrastructure, communicating complex systems and technology concepts to learners with varied technical backgrounds.
- Developed structured learning materials, presentations, assessments and examinations aligned with curriculum requirements.
- Provided guidance, feedback and technical support to students, adapting communication to individual learning needs.
- Contributed to curriculum development and continuous improvement of teaching and learning materials.
- Maintained clear documentation and communicated technical concepts in an accessible, structured manner.

Trainee Business Analyst – Ferentino Tire Corporation (Pvt) Ltd

Mar 2021 – Jan 2022

- Gathered and documented business and system requirements while working with users and technical teams on enterprise solutions.
- Supported SAP S/4HANA-related process analysis, system improvements and issue resolution.
- Participated in system testing, UAT and validation prior to implementation.

EDUCATION

Master of Information Technology and Systems –University of Tasmania, Australia

2025 – 2026

Relevant Study: Business Process Innovation; ICT Systems Project; Software Testing & Quality Management; Strategic Requirements Management
Expected Final GPA: 6.6/7.0

MSc Project Management – University of Bedfordshire, UK

2023 – 2024

BSc (Hons) Information Technology – Information Systems Engineering – Sri Lanka Institute of Information Technology (SLIIT), Sri Lanka

2019 – 2023

Diploma in English Language and Literature – Aquinas College of Higher Studies, Sri Lanka

2019 – 2020

ADDITIONAL INFORMATION

Languages: English, Sinhala | Work Rights: Student visa valid until March 2027; intend to apply for Temporary Graduate visa (subclass 485) upon course completion.
